

Paint Specification For Weigh Bridge (Truck scale)

General Description:

The paint specification is used for industrial truck scale. For custom scales with special requirements, paint specification should be followed by the design documents or the manufacturing document.

Paint type and color (see the table as below):

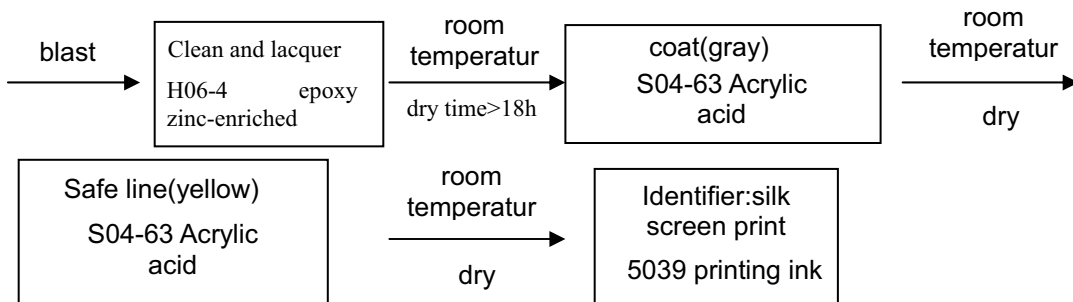

Part Description	Specification		
	Spray way	Color of Paint	Paint Type
Platform	Airless	Gray B05	S04-63Acrylic acid polyurethane
Identifier	Silk Screen Print	Blue	5039 printing ink
Safe line	Airless	Y07 Yellow	S04-63Acrylic acid polyurethane
Foundation Parts	Air/Brush	Black	S04-63Acrylic acid polyurethane
Primer	Airless	Dark Gray	H06-4 epoxy zinc-enriched

Parameters:

Description	Specification/ requirement	Feature
Primer: H06-4 epoxy zinc-enriched	Dry film thickness: 40~60μm	High-adhesion, anti-corrosive, a special primer for the container(sea transportation available);
coating:S04-63Acrylic acid polyurethane	Dry film thickness: 40~60μm	good performance when operating outdoor , weak acid-resistant and weak alkaline- resistant
